PRODUCT TECHNICALS

Crops & Segment	Watermelon: Black Seeded Elongate
Variety Code	GTP 1002
Product Picture	 
Key Products' Advantage	Big size with dark green skin and broad leaves with good cover. Red flesh color with good taste
Type & Position	Sugar baby seeded for open field cultivation better under dry and cool climate
Features	Easy fruit set
Plant Habit	Early to mid-maturity, good fruit set and foliage cover
Fruit Descriptions	6-8kg, Torpedo dark skin and red flesh with good shelf life, uniform fruit shape and size. Good keeping and eating quality with high brix
Disease Resistance	Good field tolerance
Breeder's Recommends	Maturity 60-70 days
Remarks (if any)	High/standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure. Moderate/intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties. Moderately/intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest or pathogen pressure. Performance may depend on local environment conditions.
