PRODUCT TECHNICALS

Crops & Segment	Watermelon: Jubilee Seedless
Variety Code	GSL 1014 Best uniform oval seedless, crispy firm and sweet taste with red color texture
Product Picture	
Key Products' Advantage	Seedless, early maturity hybrid with oval and very uniform fruit, firm flesh with good red color and taste
Type & Position	Jubilee, seedless for open field cultivation
Features	Easy pollination and fruit set
Plant Habit	Early maturity with good foliage cover
Fruit Descriptions	Oval 6-7kg fruit with dark green stripe, uniform fruit shape and size. Deep red color firm flesh
Disease Resistance	Good field tolerance
Breeder's Recommends	
Remarks (if any)	High/standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure. Moderate/intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties. Moderately/intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest or pathogen pressure. Performance may depend on local environment conditions.
