PRODUCT TECHNICALS

Crops & Segment	Waxy Sweet Corn
Variety Code	GPS1024 - PINKY
Product Picture	35% Sweet + more softener + highest yield 
Key Products' Advantage	Large ear segment to higher yield, Softener waxy corn with sweet mix 35%, very strong plant, good fill tip and ear setting, less of blank plant (less of no ear plant setting).
Type & Position	Tropical region, match with low land and mid land.
Features	Best of fresh consumption, Beautyful deep pink and white color kernels.
Plant Habit	Plant height 170-200 cm., maturity 55-60 day after sowing. Good root system and standability for low and mid land, for all wet and dry season.
Ear Descriptions	Ear weight 350-420 gram with 19-20 cm. length. Cylindrical and uniform shape
Disease Resistance	IR: NCLB, DM
Breeder's Recommends	Highest yield, sweet flavor taste. Still longer softener kernel after cooked, and very attractive deep pink color after cooked.
Remarks	High/standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure. Moderate/intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen, but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties. Moderately/intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest or pathogen pressure. Performance may depend on local environment conditions.
