PRODUCT TECHNICALS

Crops & Segment	Tomato Hybrids
Variety Code	GSQ 1160
Product Picture	
Key Products' Advantage	Better yield due to good fruit setting with high heat climate and TYLCV resistance.
Type & Position	Good deep red fruit color with good cost saving via early maturity and open field practice.
Features	Deep red color fruits, shiny skin and early maturity behavior.
Plant Habit	Determinate plant with early maturity. Strong TYLCV disease resistance. High fruit setting on heat climate environment.
Fruit Descriptions	90-100 grams in weight, with good deep red color square fruit shape.
Disease Resistance	HR: TYLCV, TM2, V, F2
Breeder's Recommends	This hybrid is recommending to processing and fresh markets, good for tropical regions with heat resistance, High yield with high fruit setting.
Remarks	High/standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure. Moderate/intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen, but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties. Moderately/intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest or pathogen pressure. Performance may depend on local environment conditions.
