PRODUCT TECHNICALS

Crops & Segment	Tomato Hybrids
Variety Code	GRM 1128
Product Picture	
Key Products' Advantage	Early maturity hybrid with good deep red hybrid.
Type & Position	Cost management via early maturity and open field practice.
Features	Good leaf covering plant, and early maturity.
Plant Habit	Good branching plant with heat setting, Determinate plant type.
Fruit Descriptions	100-120 grams weight with square fruit shape, and very good transportation ability
Disease Resistance	HR: TYLCV, TM2,
Breeder's Recommends	Best for heat regions, Best for process purpose with early and harvesting period, deep red color fruit.
Remarks	High/standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure. Moderate/intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen, but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties. Moderately/intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest or pathogen pressure. Performance may depend on local environment conditions.
